

Component	Component Pin	NodeMCU Pin	Note
MQ-135 Sensor	VCC	Vin	Needs 5V to heat up the sensor.
	GND	GND	Common Ground.
	A0 (Analog)	A0	Sends the gas concentration value.
DHT11 Sensor	VCC	3V3	3.3V is standard for this sensor.
	GND	GND	Common Ground.
	Data / Out	D4	Digital data signal.
I2C LCD	VCC	Vin	Needs 5V for a bright backlight.
	GND	GND	Common Ground.
	SDA	D2	I2C Data line.
	SCL	D1	I2C Clock line.
Buzzer (5V)	Positive (+)	D5	Controlled by code logic.
	Negative (-)	GND	Common Ground.
Red LEDs (x2)	Long Leg (+)	D6	Use 220 Ω Resistor between pin and LED.
	Short Leg (-)	GND	Connect legs of both LEDs to GND.
Green LEDs (x2)	Long Leg (+)	D7	Use 220 Ω Resistor between pin and LED.
	Short Leg (-)	GND	Connect legs of both LEDs to GND.
